**Are you eager for a media player which plays all your media files?** The Eminent EM7485 3D Full HD Media Player with Realtek RTD1186 chipset plays almost all video and audio formats on your Full HD 1080P television. Even Blu-ray ISO files and DVD ISO files, which aren't supported by your Smart TV and tablet! Play your media files from the internal hard disk, USB stick, SD card, NAS or your network to your television.

**Supports almost all file formats**

After you had bought a Smart TV, you were longing for a relaxed movie night. Only your Smart TV doesn't play the movie because of its limited file support. The EM7485 plays almost all file formats. Even BD-ISO and DVD-ISO files. Besides that, the media player supports 3D file formats too.

**A real cinema experience at home**

Play the sound of your movies and music via the television. Do you own a external amplifier? Then you can play the audio via your home cinema system. The EM7485 media player gives you a full cinema experience by its crystal clear video and sound.

**Watch your home videos and photos on TV**

Connect your digital camera via the USB port to the EM7485 media player and watch your home videos and photos on TV directly. You can even insert a SD card into the built-in SD card slot. Listen to your favourite music while watching the slide show.

**Play media from the internal hard disk, USB stick, NAS or stream from your network**

Play your media files via the self-built-in hard drive. Connect an USB stick or external hard disk to the player and play your pictures, music and movies on your television. Prefer sharing files in your network via DLNA, UPnP or Samba? Or stream from your NAS or computer? No problem! The EM7485 plays all your files. Installing a hard disk by yourself, is a piece of cake with the 'easy mount slot'.

**Easily select your favourite movie**

Download movie information and covers with the EM7485 media player. Use the cover view mode to create a clear video library. This useful video library ensures an easy selection of your favourite movie.

**Always the right subtitles**

It is not a problem anymore when the subtitles of movies are missing. The subtitle download function of the EM7485 provides you with the right subtitles. From now on you always watch movies with the suitable subtitles.

**USB 3.0 High speed data transfer from your computer to your media player**

The fastest way to transfer data to your internal hard drive is by USB 3.0. Connect the media player to your computer by the USB 3.0 port. Transfer your media files at high speed to the hard disk of the media player. The player supports both USB 2.0 and USB 3.0 ports.

**Summary of features**

The EM7485 media player is equipped with a Realtek RTD1186 chipset. This chip especially is designed for playing media files on your TV and supports a wide range of audio and video formats and codecs. A few important formats and codecs are: MPEG 1-2, MPEG 4, MKV, ISO, BD ISO. Take a look at the technical specifications for the complete overview. This player is also equipped with HDMI 1.4 and supports 3D video: Frame Packed, Side-by-Side and Top-Bottom. An HDMI 1.4 cable is included. Sound is played on your television with help of the DTS downmix function. Use RAW audio when an external amplifier is connected. USB 3.0 transfers data at high speed from your laptop to your media player. The USB 3.0 cable is included. The USB 3.0 cable also functions on USB 2.0 ports. Would you like to read all technical details? Please take a look at the technical detail page.
